#### INVITATION TO JOIN A WORLD-WIDE RADIO AMATEUR PROJECT

AMSAT-Italia extends an invitation to radio amateurs to join their on-going worldwide radio-amateur project on the Ionosphere, and particularly on its predictability for our radio communications.

The project, called "Ionosfera" is supported by the European Space Agency (ESA) within its framework on the Space Weather: a "new" science with re-

spective applications focusing on the many interactions between the Sun and Mother Earth.

AMSAT-Italia recently answered the ESA Call for Proposal to develop a series of (free-of-charge) internet-based services for the radio amateurs dealing with the radio propagation via the Ionosphere. We invite you to access the European Space Agency (ESA) website on Space Weather at [www.estec.esa.nl/wmwww/wma/spweather/](http://www.estec.esa.nl/wmwww/wma/spweather/) and to read the one-page synopsis on “Ionosfera” at [www.estec.esa.nl/wmwww/wma/spweather/esa\\_initiatives/pilotproject/synopses.html](http://www.estec.esa.nl/wmwww/wma/spweather/esa_initiatives/pilotproject/synopses.html).

AMSAT-Italia invite radio amateurs to contact them with any comments, suggestions, contributions and/or clarification on the project. They would also like to hear from you if you have already designed a similar/complementary project on Ionospheric radio propagation and/or another radio amateur project linked to Space Weather. They would be interested in creating or joining a world-wide network of motivated radio-amateurs willing to exchange and implement their findings in a common project. The co-ordinator of the project is Florio, IW2NMB, and he can be contacted at [iw2nmb@amsat.org](mailto:iw2nmb@amsat.org).
